# Movie Review: Ulan

Ulan tells the story of Maya who was raised by her grandmother. As a child, Maya became aware of the mythical create called "Tikbalang" (half-horse, half-human) and the superstition that rain pours in the middle of a sunny day when two of these creatures are being wed. According to her grandmother, it means that heaven is not in favour of this union.

As a young woman, Maya is a hopeless romantic. She works in a publishing company as an editorial assistant. She has fallen in love and has been heartbroken twice. And then she meets Peter who is kind, thoughtful, helpful and every bit a boyfriend material. But Maya realizes that each time she's onto something good, rain falls all of a sudden.
